

Where we are

❖ It can now be finalized very soon

1. Draft spec: <https://raw.githubusercontent.com/w3c/pwpub/master/spec/ocf-lite.html>
2. Open issues: <https://github.com/w3c/pwpub/issues>

Main remaining issues

- ❖ **LPF Processor conformance requirements (#36)**
 - ❖ First shot in Section 3 of the draft
 - ❖ Question about missing resources (referenced in the manifest) and extra resources.
- ❖ **"base URL" and "origin" of an LPF Package (#45)**
 - ❖ No origin => conversion of a WP to an LPF is out of scope; it's a work for the WebPackaging spec
